## APM 2.6 FOR EXTERNAL MAGNETOMETER

Providing the same advanced, multiplatform capabilities as APM 2.5, the 2.6 revision of the award-winning APM autopilot is designed for an external magnetometer. This improves flight performance by allowing the compass module (or combined GPS with compass) to be placed further away from sources of potential magnetic interference.

### CONTENTS

- APM 2.6 board with case
- APM power module (PM)
- PM 6-position cable
- Micro USB cable
- Telemetry adapter cable
- JP1 jumper connector (4 mm)
- PPM jumper connector (6 mm)

### PLANE

To set up your APM 2.6 board using the APM:Plane firmware please visit:

[PLANE.ARDUPILOT.COM](http://PLANE.ARDUPILOT.COM)

### COPTER

To set up your APM 2.6 board using the APM:Copter firmware, please visit:

[COPTER.ARDUPILOT.COM](http://COPTER.ARDUPILOT.COM)

### ROVER

To set up your APM 2.6 board using the APM:Rover firmware, please visit:

[ROVER.ARDUPILOT.COM](http://ROVER.ARDUPILOT.COM)
